Unless you're interested in getting into the art of tinkering with the digital bits, or need to create photo books and calendars, which require specific professional software, you can simply choose to use other photo-editing programs, such as Adobe Photoshop Elements, Adobe Photoshop

---

Lightroom, or Adobe Photoshop CC. I recommend using only one of these programs as your primary tool and using another (usually Photoshop) as a plug-in or companion when you edit images. Finding out the basics Learning how to use Photoshop is easy. The techniques for using the commands in the menus to manipulate digital photos are covered in the next sections, and the tips for learning more and creating interesting photo collages can be found in Chapter 18.

In addition, the creative brushes feature in Chapter 10 also helps you enhance and control every part of your images. Adobe provides a printed book, *Creating Artistic Photography with Photoshop*, that covers how to use Photoshop's features more in depth and help you use each feature to its fullest potential. Finding your way around Photoshop Photoshop has a very simple learning curve for users, and the classic desktop version is one of the easiest programs available in any of the standard Windows versions. However, if you have a Mac version,

---

you'll encounter some additional features, but not many steps more than those included in the user's guide. Photoshop's interface The menus and editing tools are each on separate tabs, allowing you to decide which tool to use to perform an edit. For example, when you use the Filter command on the top menu and the Enhance command on the bottom menu, the Enhance menu is active and the filter menu is inactive (see Figure 1-1). The same is true for editing an image's Fill or Shadow colors.

**Figure 1-1:** The main menu provides access to different tools that can be used to control an image. You can also open the Tools palette (sometimes called the Options palette) by pressing the Tab key. The Tools palette, shown in Figure 1-2, offers access to the Brush tools, the Tools (or Effects) panel, and other items as well as a bit more detailed information on a tool in the right-click menu. Figure 1-2 shows the brush that I used to create the image.

### **What's New In?**

Thinka daisies, and rosehip fruits I saw a stage whisper now and again amongst masses of people, repeated peering of groups of friends and acquaintances. "That's like something I'd do..." "That's like something my friend would say..." "That's like something that guy would say." It's a wonderful thing to imagine yourself in the minds of others. They see what you

---

see, and they tell you their ideas about it. And so it gives you a chance to think about your own ideas about your audience and about how you want them to see you. Sometimes it's also good to step back and think about how those other people might be thinking about you. And then you can look for examples of how that person/group might be seeing your ideas. Do they see the same things as you? What? Do they get a contradictory message from you? What is it? We often get caught up in the rush of the day and working without thinking about how the people we are interacting with might be thinking about us. My friend, Matt, and I used to have a good laugh over how we sometimes got caught in that trap. We had these big ideas. We had this vision. And then in the moment of pushing it out as fast as we could, we didn't take the time to think, "wait a minute. Do they see that? Does that get in the way?" The answer, for both of us, was often yes. So we had to take time to think more about what they might have seen, and to take it

out when it's a better fit. This is why, in my work, I try to find ways to show my audience how I see them. I try to show what I see of myself in them. For example, I love chocolate. I'll admit it. I like it a lot. It's just one of those things. But it's one of those things that I see in them, which I have a funny way of showing. On the stage, I throw all the chocolate up in the air and gesture wildly for the audience to follow me into my arms. At the most recent performance, I held up two tickets for a show I'm performing in, and I'm
