Note If you're not editing a lot of images, you'll get by just fine with GIMP, another photo editor. It supports a lot of photo-manipulation tasks and is a great tool for when you just want to quickly generate graphics. However, you can use GIMP for editing photos as well. Table 5-2. Which tool is best for editing a specific task

Task	Best tool for the task
Create graphics, editing logos and designs	Photoshop
Edit photos	GIMP
Edit, organize, and categorize media, like movies	iMovie
Edit videos and audio, like music files	iMovie
Edit, organize, and categorize paper documents	Photoshop
Photoshopping: create collages, retouching, correcting photo spots	Photoshop
Vector graphics: drawing and editing shapes, diagrams, and logos	Illustrator
Collage and photo editing	Photoshop
Image cutting, resizing, and manipulation	Photoshop
Alignment, color/contrast adjustment, and graphics creation	Photoshop

## Making Color Work for You Every camera produces images in a particular way, meaning the colors don't accurately represent how a scene will appear. The colors you see on your camera's screen or in your image editing application may appear a lot different. This section takes a look at the ways you can control the color space a photograph is in, including one way to automatically convert colors in your images.

What is Photoshop Elements? Blending the features of Photoshop and the simplicity of MS Paint, Photoshop Elements is a graphic editor that allows users to edit digital images, create GIF animations, create presentation backgrounds, and produce online ads. When you first open Photoshop Elements, you are greeted with the following screen. Select "start" to begin editing your image. It is best to use the default settings and leave everything alone. But it is not necessary to be a picture doctor, or a photo wizard. There are several menus that can be used to easily adjust or modify the image, including: the three "main" menus, the several "other" menus, and the on-screen keyboard. In addition, the options menu can be accessed from all menus and locations. How do I access and use the three "main" menus? The "Edit Menu" is always on the left side of the screen There are three "main" menus: "Edit" Menu The "Edit" menu is always on the left side of the screen and is easily accessed by pressing the "L" key on the keyboard. There are the following options available from the "Edit" menu: "Edit > Edit" This allows you to select what kind of editing you want to perform on your image. "Edit > Enhance > Enhance" This allows you to adjust the overall brightness, contrast, and color of the image. "Edit > Enhance > Adjust Brightness/Contrast" This adjusts the brightness, contrast, and overall contrast of the image. "Edit > Enhance > Curves" This controls the overall amount of brightness and contrast in an image. "Edit > Enhance > Tone Curve" This controls the brightness and contrast of specific areas in an image. "Edit > Enhance > Shadows/Highlights" This controls the overall amount of brightness and contrast in an image. "Edit > Enhance > Clarity" This adjusts the sharpness of a specific area in an image. "Edit > Enhance > Sharpen" This sharpens the edges of an image. "Edit > Enhance > Retouch" This adds pixels to an image. "Edit > Enhance > Texturize" This allows you to add texture and grain to an image. "Edit > Enhance > Zoom

Mother-to-Child Transmission of HIV. Each year, approximately 300,000 children are born to HIV-infected mothers in low- and middle-income countries. Current methods of delivering antiretroviral drugs to mother and child during pregnancy and delivery are not optimal for preventing mother-to-child transmission of HIV. Most pregnant women should be treated with antiretroviral drugs, in part for prophylaxis of HIV-associated adverse outcomes, including preeclampsia, intrauterine growth restriction, and death of the fetus. The currently available regimens for prevention of mother-to-child transmission of HIV include single or double antiretroviral drug regimens during the third trimester of pregnancy. Many other regimens are also available but have not been formally tested in large-scale, clinical trials. Few maternal regimens are associated with birth outcomes better than single, short-course antiretroviral drugs during pregnancy. The World Health Organization and other organizations have prioritized reduction of mother-to-child transmission of HIV as a key component of efforts to achieve the goals of the Joint United Nations Programme on HIV/AIDS.

Q: A definite integral using Cauchy-Dirichlet and Cauchy-Schwarz inequalities Let  $f(x) = \frac{1}{2} \left( 2x - x^2 \right)$  for  $-1 \leq x \leq 1$ . Prove that  $\int_{-1}^1 f(x) dx = 0$ . Hint: Use Cauchy-Schwarz inequality. So I have proved that  $f(x)$  is non-negative on  $[-1, 1]$ , so it is also non-negative on the extended interval  $[-1, 1] \cup [2, 2] \cup [4, 4] \cup [6, 6] \cup [8, 8] \cup \dots$  However, when I apply Cauchy-Schwarz inequality I have  $\int_{-1}^1 f(x) dx \leq \left( 2 \cdot \int_{-1}^1 \right)$

Unfortunately, I will not be able to attend the dinner on April 17. Please let me know if you need any further information. Regards, Krishna. ----- Forwarded by Pinnamaneni Krishnarao/HOU/ECT on 04/06/2001 02:06 PM ----- Enron North America Corp. From: Pinnamaneni Krishnarao 04/02/2001 02:54 PM To: Vince J Kaminski/HOU/ECT@ECT cc: Subject: Visit to Enron, April 16, 2001 Vince, I just got back from visiting the Research Group. I met with the members there who will be using these researchers. It went well, and I am attaching a bullet point summary of the plan. I will be in touch soon with details on the actual researchers who will be visiting. I will see you in April. Regards, Krishna.

Q: Powershell Script to Copy File I am attempting to write a powershell script that will extract a file from an excel file, and copy it to another computer. I am trying to setup a scheduled task to run a powershell script that will extract this file, and copy it to another computer. I have seen various examples, but do not understand them as I am new to Powershell scripting. I'm sure this can be done by simply changing the path for the destination, but am not sure how to do that. Any help would be greatly appreciated. I've tried this so far:  $\$path$
