## DICOM Inspector.NET Crack + With License Key Free Download

DICOM Inspector is a standalone application that can be used to view DICOM files. It is mainly used for viewing and analyzing DICOM images and transferring images and other similar files. HIDOM is a new Flash based interface for the Winrar utility, allowing users to keep all the functionality of the Winrar 2.6.7 application, but interface with it via a browser. Main feature of HIDOM is "Open with HIDOM" which helps you choose application for opening files. It is also possible to use HIDOM to download a single file, and it will prompt you for saving the file. In addition it can show you all the details about selected file and show you command to add to context menu. HIDOM can be used for browsing archives, view their contents, open with HIDOM, use HIDOM as file manager, and many other things. Image Lock is a utility which allows you to modify the Windows Registry in such a way that it prevents other programs from being able to use the files associated with a specified DLL. To enable this security feature, you simply need to create a registry subkey under HKLM\Software\Microsoft\ImageLock. Each DLL for which you want to protect the files associated with it should be assigned to a subkey under the HKLM\Software\Microsoft\ImageLock\Dll key. If you want to

---

allow more than one program to access a certain DLL, you can add a subkey under the HKLM\Software\Microsoft\ImageLock\Dll key for each program. APK File Extractor is a utility that can be used to extract Android APK files. The main purpose of this application is to help you extract APK files and view their contents. The program is an amazing tool that can extract multiple APK files. APK File Extractor is powerful, and can be used for many purposes. It can be used to view APK files, extract them, extract APK files from CAB files, extract APK files from CAB and DMG files, extract and view all files in APK files, extract ZIP files from APK files, extract all files from APK files, extract all files from ZIP files, extract files from APK, extract files from ZIP, extract audio files from APK, extract music files from APK, extract movie files from APK, extract movies from APK, extract document files from APK, extract all files
