We aimed to develop an integrated care pathway (ICP) for the management of patients with hypertension and diabetes in primary care in the UK, the primary focus of which was to support patients to attain and maintain control of blood pressure and glucose levels, and to support and facilitate patients' progression through primary care and secondary care. A survey was carried out to identify successful initiatives and a review of international literature. The programme was developed in three phases: an initial development phase, a feasibility phase

## What's New in the?

Drawer Namespace: A new namespace called Drawer with Drawer Name Extension allows you to assign a name to each  
of your drawings in the Drawer. You can rename the Drawer with the assignment of a drawer name for each Drawing that  
you make. When you create or open an.rxd file, the file automatically assigns the name to the folder. You can also use  
this feature to create your own custom template library. You can assign a name to all the drawings in a template. When  
the user opens a.rxd file, it creates a new folder and opens the drawing, the new folder name is then used as the name  
of the new drawing. (video: 3:15 min.) MasterDraw: The tool of the future, your MasterDraw. Create a template with a  
drawing and make edits to the template in a simplified way, while editing the drawing directly. Take advantage of our  
next-generation refactoring technology, which allows you to detect changes to the drawing without having to reparse.  
You can be sure that all drawings in the template will be updated. With MasterDraw, you can work directly with the  
drawing and directly make changes to the drawing. Your changes are detected and in turn, are applied to all the  
drawings in the template. (video: 4:35 min.) Parameter Editor: The Editor with Parameter Control provides drag-and-drop  
editing of drawings that support parametric constraints. Add, delete and modify parameter constraints, without leaving  
the drawing. Control the updated results by selecting, inserting, deleting, and rearranging parametric constraints in the  
drawing (video: 1:42 min.) The Microsoft® AutoCAD® Developer Platform 2019 update is available now. Register your
