The Christmas House Crack Theme creates a visually pleasing and relaxing theme for Windows 7. This theme has a cartooned house in the middle of an unfrozen world. You can also choose between a holiday decor scheme or

---

a winter scheme. The entire theme is well-rounded and ties in with both the holidays and winter. A nice touch is that the theme should be run in a Windows XP style screen environment, too. This theme is optimized for screen resolutions of 1024 x 768 and up.

---

While Christmas House is beautiful, the color scheme is the image shown above, blue with white snow. A winter theme wouldn't be complete without a bit of snowy trees, right? Nope, just go with a different theme and you have one :) Now let's take a look at Christmas House for

---

Windows 8: The high-resolution image is a lot more colorful. However, I still prefer the windows in the theme to be darker, not only the actual house. One thing I will say though, it isn't a lot of work to get the theme to work in both XP and Windows 8. The hardest part was finding

---

out how to remove all the snow and get rid of the navigation background. Christmas House for Windows 8: Christmas House for Windows 8 is a lot more colorful than the XP version. It also comes with a Windows 8 theme change, which is available in the Winter

---

Release and be default is the light theme.

However, the default theme can be changed in the Winter Release or via the Christmas House Control Panel. Both versions of the theme are included in the package. Christmas House brings a lot more fun to my Windows 7.
