Throw Me in the River is a visual novel in which you need to take a journey to find the truth, as well as discover your life's purpose. Throughout your search, you'll encounter three major characters and view various scenes depending on your choices. The soundtrack by Yiushi contains eight traditional guitar songs composed and arranged by the legendary Masayuki Kajita, along with five pieces of a soundtrack dubbed "Saber-toothed Tiger". Warning: Although this is not a true visual novel, scenes will be displayed in a manga style. Additionally, a special part is added to the soundtrack. It is an extra piece featuring a true Japanese rock band, NoneSasai. This arrangement can only be played in the PlayStation4 version of the visual novel. Customer Reviews 8 out of 10 found this helpful. Disappointing ByThe Unsung Nerd To be honest the score of Throw me in the river by none saison is extremely disappointing. the theme that's sort of told throughout the story is bland and cliche. no fight scenes, no flashy moments, it's just a couple guys holding onto each other and talking, very little of the story is told through guitar music. that's it, but i know that the music was planned and arranged to have a certain theme throughout the visual novel. also the progression of the sound doesn't quite mesh together, it starts off very calm (with a very, very light concept behind the soundtrack) and as the story progresses through episodes, the sounds get more intense and in turn create an uneasiness in the player. the only thing that works with the guitar is none sasai, their guitar riffs are all good (amongst the rest of the soundtrack) and overall i thought that they did a very good job, but it's not enough. also, i really liked the idea of the story because of the nature of the guitar music and the calm tone throughout the story, but it wasn't executed in an appropriate manner. 10 out of 10 found this helpful. Great ByTeamBabybob! I really recommend this soundtrack as it is amazing. It has everything: Violin, flute, and guitar. Best of all, is that the scoring is all sorta-J-Pop influence. It has a great mix of the guitar and
