Line objects, such as lines and polylines, can also be drawn and connected. AutoCAD can be used to create 2D and 3D architectural drawings, as well as engineering drawings, such as mechanical drawings, electrical drawings, piping diagrams, and sheet-metal drawings. The drawing can be viewed from any angle with the added ability to create annotations. In addition, the graphics engine can automatically detect objects and create them, layer objects, create nonstandard objects such as polygons, and even recognize or digitize data. A wide variety of editing tools allow drawing to be created quickly, such as editing lines, joining, deleting, reshaping, and transforming objects.
