The instructions and the form was very easy to follow and presented in very simple words. I enjoyed the level of support and I can definitely say that this is the best program I have downloaded on the internet. The web-based interface is quite intuitive. It's dead easy to use and simple to understand. The instructions explain each step at a very nice pace. There's no advertising, no auto-updates, no hidden charges and no fake flashing buttons on the interface. The program I use to count the coffee beans is called GROWLIPS by Zero G Software. I use this program for many things. It counts the coffee beans you buy on your mobile phone, it counts the store purchased coffee beans, it counts the output in your vending machine and much more. I received instructions on the download and the download is a single executable file that I used to run the software which offers a very easy user interface. I would use this program again. I suggest you try it out and see if you like it. I did. This is a useful program and I heartily recommend it. I did. This is a nice program to add to a writer's kit. I especially enjoy that it includes all the published formats.
