i recommend this course because i think it has the best balance of content that you need to pass the cisa exam. the crr portion of this course is comprehensive and is one of the most tested modules on this course. it will prepare you with the knowledge and understanding that is required to pass the crr. i feel that if you arent clear on the basics of what the crr is asking you to address, then youre never going to pass it or earn a passing grade in your cissp. if this course isnt right for you, then all of the other cisa courses offer the same practice testing and drills that you need for exam success. so, if you feel that this course isnt enough, then you should probably move on to another cisa review package since they all have the same information. but if you want to really focus on your preparation, then i feel that surgent cisa review is a package that will show results in the amount of time that you invest in your studies. the realistic pricing of this course is what drives my recommendation for this course. it provides the most advanced practice questions available to help you pass your exam. i feel that if youre getting five times as many practice questions as you need to pass your cissp exam, then youll be well prepared by the time youre sitting down to take the test. however, if you need the help to pass your exam then i wouldnt expect to spend less than \$1,000 for a cisa review package and that probably doesnt include any video or audio lessons. but again, that isnt the case with surgent. theyre going above and beyond what others are able to offer.
