one of cactusvpngs drawbacks is that it has a long connection delay if you want to go somewhere in the us. but otherwise, it works great and is a great vpn if you want to stream content. in my opinion, its better than tunnelbear s. unblock us netflix from anywhere: fios tv unblocker helps fix the issues netflix is having with region locks. it unblocks videos and lets you watch all netflix from anywhere (even when outside of the united states). this feature comes with an easy-to-use us netflix app installer for android, ios and windows. conclusion: it seems like cactusvpngs service really hurts the other vpns in terms of customer support and ease of use. its customer service reps were really helpful and came back in a matter of hours. but its lack of dedicated customer success team, convoluted menus, and crashy android app make it difficult to recommend. cactusvpn has decent server locations. while not as many as expressvpn, cactusvpn has servers in 32 countries, including china, singapore, sweden, hong kong, and the uk. its customer service guys also answered all my tech support questions in a matter of minutes, which isnt always the case with vpns. speed tests. my real-world download speeds were similar to results i obtained elsewhere. i download a large 40 gb file at nearly half the speed, and websites loaded with just a few visible buffering breaks. speed tests work best with vpns that don't drop many packets; i tested cactusvpn with qbittorrent. as i've mentioned, some vpns did perform better than others.
