This software provides a way to analyze your hard drive, examine different hard drives of your computers, perform defragmentation and do a backup of your data. Hard disk health can be monitored and hard disk speed can be measured. The software provides a way to create a backup of your data in two different ways. The backup can be either to an external hard drive or you can select a special place in your computer to store backup files. Some of the things that the software does is it backs up your personal data like your documents, music, videos, photos, data stored in the internet and many more. A solution to hard drive defragmentation. You can check hard disk state, retrieve items that have been deleted, hard disk cleaning, and check hard disk fragmentation. You can also test hardware components like cpu speed, memory usage, hard disk speed, and more. I've been using this software since Vista days and it's probably the most advanced freeware tool out there for monitoring and cleaning hard drives. I first installed it because my drive was being really slow, it said it was reformatting the drive, I selected that and it finished within 5 minutes. Then the software came back and said that the disk was still very slow and it needed a clean up. It took about 5 minutes, and after that the disk speed went to normal. I ran this program after XP installs from scratch and it solved the slow hard drive problem. My Next purchase will be to get the Premium version, I want to be able to

see my cpu/memory, game hdd usage, etc. Good program. I have used this software for many years. The program is fairly easy to use. I do like the speed that it runs the defrag tool. One thing I do not like is that it is not easy to change the program you want to run when the defrag tool is running. The defrag tool is running by default and does not allow you to select another. I have used the product for many years now and have had it on several computers. I would recommend this software. I have used this program for many years now and have had it on several computers. I would recommend this software. I love it. The defragmentation is great. I use it on every hard drive that has Windows XP on it. I don't really care if my hard drive is slow or fast. As long as
