English Urdu Dictionary - Lite is a software tool, developed in Java, in order to help native English speakers learn Urdu words, as well as vice versa. This utility is portable, which means the Windows registry and Start menu/screen are not going to be affected in any way, and there will be no leftovers upon its removal. In addition to that, you can copy the program files to a removable storage unit and run English Urdu Dictionary - Lite on any computer you have access to, by simply clicking the EXE. No need to worry about the installation process, as it is not a prerequisite. The interface sports a fairly simple and intuitive design, being comprised of a few drop-down menus, buttons and a panel to display your results. This means that anybody can use this app with great ease, be they experienced or not in the IT department. This dictionary encloses 12.000 of the most commonly used words in both languages, and it is important to understand that it will not display definitions or examples, but rather synonyms. Furthermore, it will include translations of similar words (e.g. if you write fish, it will also display fisherman, selfish etc.). Softpedia tests have revealed that the CPU and memory usage is minimal, and thus, your computer's performance will not be burdened. Help contents are not provided. However, when considering how simple to use this tool, you realize they are not actually needed. All in all, English Urdu Dictionary - Lite is a useful piece of software that can help you translate particular words from one language to another, without encountering issues.
