The most important aspect of writing a story is introducing a plot that would guide your characters and plot their progression from the beginning until the end. Dramatica can help you come up with a story. The app is divided into

various modules that help users develop a story. In this review, we will take a look at the Writing Module. The feature in this module includes an overview, a Character Generator, a Character Sheet, a Differentiation Checker, a Workout Modules and a Staging Sheet. The app guides

users through the process of developing a story. To get started, you need to choose the mode of writing you want to use, either Writing Guide or Writing Journal. In either case, the app divides the story into various characters, settings, events, and location. To start with, you need to

choose the character you want to create. To do so, you should first choose the Role and then fill in the remaining information. An interesting aspect of this module is that it's designed to allow users to assign multiple characteristics. For instance, they can specify

if your character is male, female, young or old. Furthermore, you can assign a name to your character, depending on what type of name you want. For instance, if your character is male, you can select something like Mister, Mister Jackson, Mr. Jackson or something along those

lines. After creating your character, you can assign its role. The app gives users a dropdown menu of common roles such as sidekick, supporting, main, and protagonist. You can also choose a custom role. For instance, if you want to create a romance story, you may select a

Passionate Love or Sex in the City Role. To create the plot of your story, you need to first choose the theme. After this, you need to move to the Plot Guide. In this interface, users can choose events, locations, plots, characters, and dramatic actions. In essence, the app helps

you build a plot in which your character would have a journey and a goal. Furthermore, the app gives users a way to gain exposure to the plot. For instance, the app let you choose who your protagonist should know. When using the app, you must choose a location, and the app will show

you everyone that lives in that location. After that, you may choose to make your character know the person, which is a bad idea. Still, the Writing Module can help you develop a story. However,
